Profile: Multi-modal transportation agency serving western US region; operating countywide bus and paratransit service; Metrolink rail service; Express Lanes toll facility; freeway, street and road improvement projects; motorist aid services and taxi operations.

Challenge: Reduce inventory stock levels while maintaining 95%+ fill rates

Solution: Implementation of Oniqua Analytics Solution

Benefits: Greater visibility into operations; ability to segment/analyze stock items by groups; quicker reaction time to fluctuating demand; rapid implementation with no disruption to operations; automatic feedback loop into asset management system .

Results: 400% return on investment; 20% reduction in inventory; \$1M in savings; significant reduction in analysis time from days and weeks to hours; reduction in purchase orders cut and overall replenishment costs.
