Project:

Woodside Energy implemented SAP PM and needed major post-implementation changes to better suit improved work practices. 143 work centers were to be consolidated into 27.

Scope:

Work process modifications necessitated work center changes in over 139,000 SAP Plant Maintenance Objects (approx. 460,000 data fields).

Solution:

Complete change cycle performed within a 24 hour window with zero unplanned defects and operational disruption.
