

About Oniqua

With operations in the Americas, Africa and Asia-Pacific regions, Oniqua is the world's leading MRO (Maintenance, Repair and Operations) analytics software company. Oniqua helps organizations maximize profits, savings and efficiencies by minimizing MRO waste, and delivers a positive return on investment in as little as three to six months. Oniqua Analytics Solution (OAS) leverages customers' transactional data by applying advanced analytics to identify inefficiencies and ensure that their maintenance, inventory and procurement operations run as efficiently as possible. Oniqua is proud to serve the world's leading companies in the oil and gas, mining, utilities and transportation industries, including BHP Billiton, ConocoPhillips, BP, Hawaiian Electric, Bermuda Electric Light Company, Orange County Transportation Authority, Vale, Rio Tinto, Anglo Coal, Newmont Mining, Alcoa, Xstrata, Drummond Company, Freeport McMoRan and many others.

MASTER DATA SERVICES

Standardize Analyze Optimize

Oniqua Master Data Services

Deriving business benefits from your data

Asset-intensive organizations increasingly understand that the key to driving asset performance is to make use of the data captured by transactional systems to continuously improve the business. However, for many organizations the quality of their data presents a major obstacle to this goal. Enter Oniqua Master Data Services; a specialist organization focused on helping you to standardize, analyze and optimize your asset-management data.

Why choose Oniqua Master Data Services?

Oniqua Master Data Services offers unparalleled capabilities combining:

- Experience gathered over more than fifteen years
- World-class analytical technology
- Standards and catalog databases
- Low cost, near-shore content and analytics service center
- Strong quality assurance processes
- Flexible and professional service

Services

Oniqua Master Data Services works with you to tailor a package of services on either a project or on-going basis. Our services include:

Material (Catalog) Master Data

Oniqua's Master Data Teams routinely provide catalog standardization and enrichment services to customers throughout the World. Our services range from the creation or maintenance of a few items a day to corporate projects involving hundreds of thousands of items in multiple languages.

Bill of Materials development

The creation of accurate of Bill of Material hierarchies is a key enabler for effective maintenance and supply chain planning – particularly for new capital projects. Oniqua Master Data Services supplies the resources and tools to take care of this task for you.

Inventory Optimization

Using Oniqua's World leading inventory optimization tool, our inventory analysts provide an outsourced service to optimize your inventory levels. Service options include access to a hosted inventory analytics system and regular on-site liaison visits.

Procurement Analysis

Oniqua Master Data Services provides spend visibility and supplier performance management services to help procurement teams operate more strategically. Customers provide raw purchasing transactions data from their corporate system and receive rich and relevant analytical information in return.

Training

Oniqua offers regular public or private training courses covering:

- Cataloging principles
- Inventory management principles
- Inventory optimization

Standards

The Oniqua Standards Dictionary is a material and catalog standards database available on a subscription basis. This taxonomy owes its heritage to the Auslang standards – a widely acclaimed implementation of NATO cataloging principles which has been refined over more than twenty years to meet the needs of asset-intensive industries.

auslang

Consulting

Oniqua consultants are privileged to work with many of the World's largest Mining, Oil and Gas and Utilities organizations. The experience and knowledge gathered through these engagements is available to you, including:

- Strategic Supply Chain reviews
- Inventory performance analysis
- Supplier Relationship Management programs
- Procurement assessments

Approach

Our approach is to help our customers by providing specialized skills and tools in a flexible and professional manner. By outsourcing activities to Oniqua Master Data Services, your key resources are able to focus on the core business.

Quality Assurance

Work performed by Oniqua Master Data Services is delivered according to strict quality assurance processes including: automated checks, domain expert review, QA certificates and warranties.
