

Client Success Story Maintenance Strategy

Profile:

Nickel refinery producing 30,000 tonnes/year undergoing major expansion, 700 employees, mature SAP user.

Problem:

Develop RCM maintenance strategies, migrate strategies to SAP and monitor the effectiveness.
213 pieces of equipment with 733 failure modes.

Solution:

5 weeks to develop maintenance strategies (what to do, when to do and by whom).
4 hours to implement in SAP including the detailed maintenance work instructions.

Benefits:

Rapid, low-cost and repeatable implementation.
75% faster implementation
75% less labour to implement.
